

How to activate .NET 3.5 in Windows 7, Windows 8 and Windows 10?

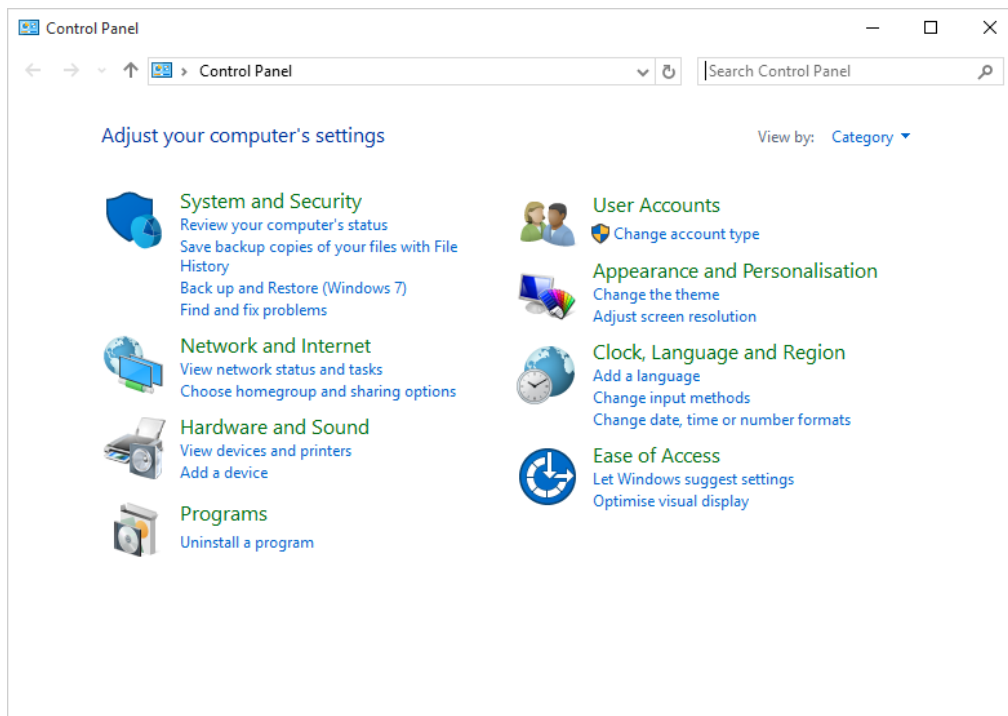

HDPOS smart Tutorials

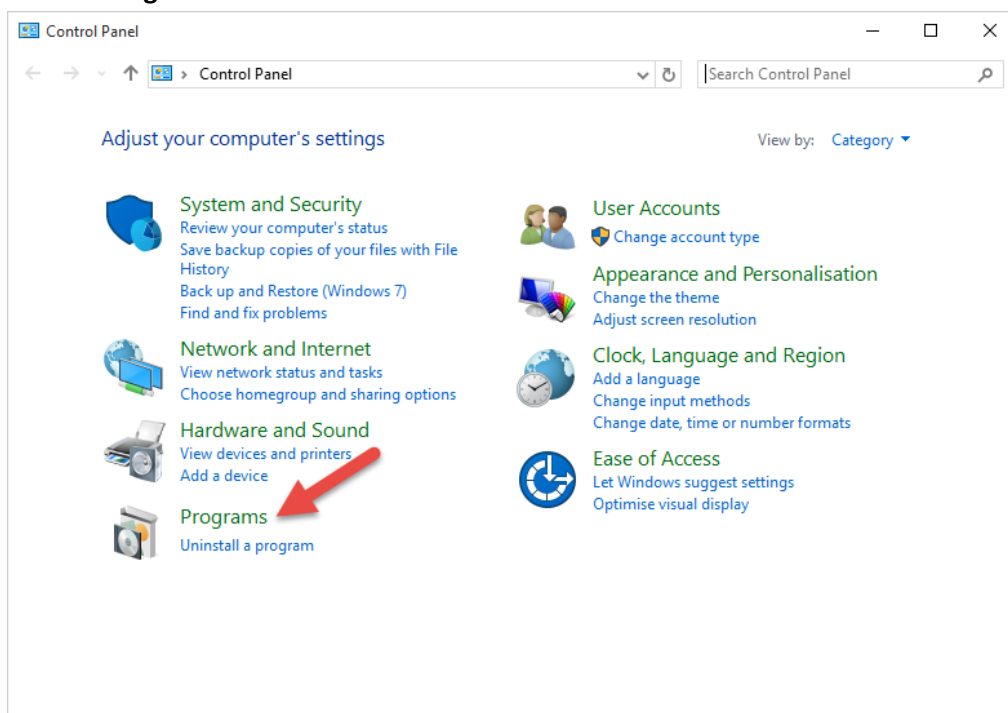

The .NET framework 3.5 is necessary for running many applications running on windows. The HDPOS Smart application can be installed only when Dot Net Framework 3.5 is enabled.

To activate .NET Framework 3.5 on Windows 7, windows 8, Windows 8.1, or Windows 10, please follow the steps given below:

1. Open **Control Panel** in your computer.

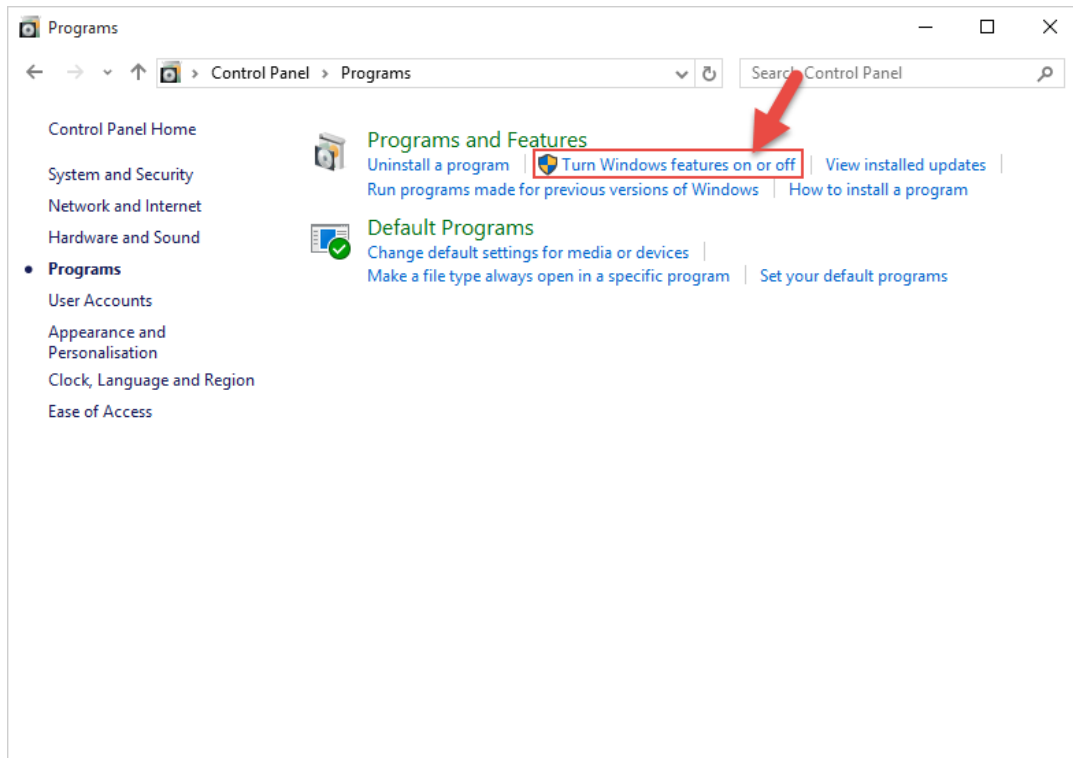

2. Click on **Programs**.

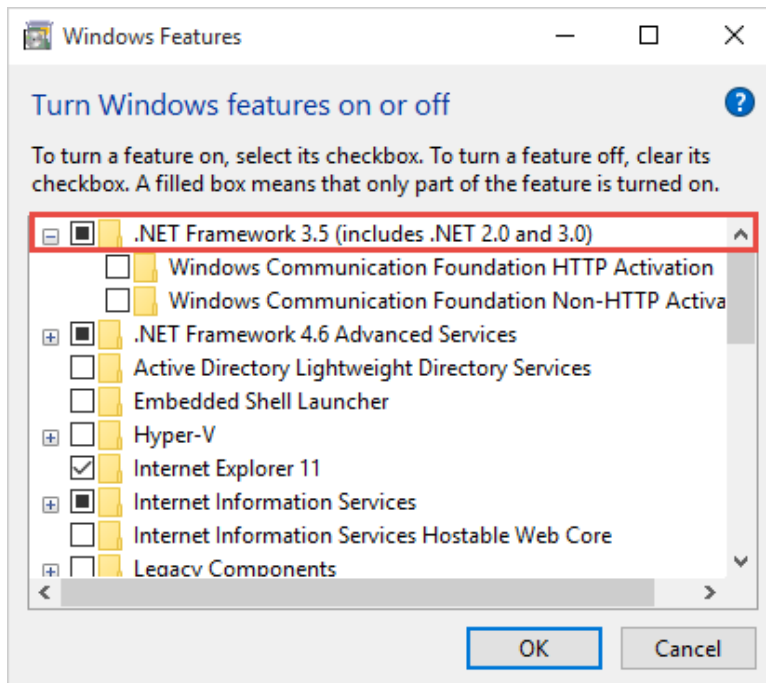

3. Click on **Turn Windows features on or off**.

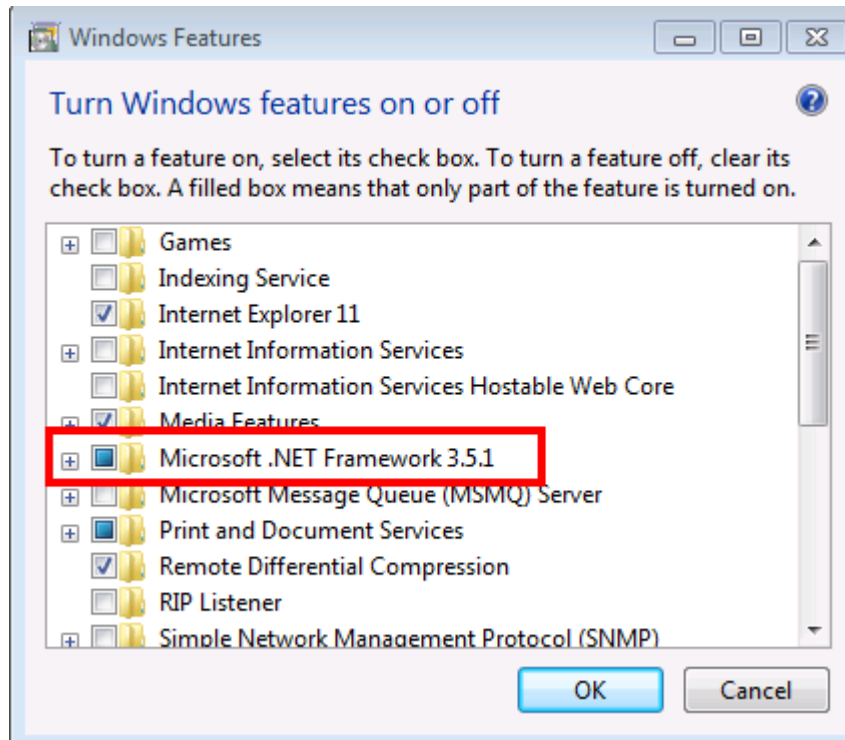

4. Check the **.NET Framework 3.5 (includes .NET 2.0 and 3.0)** checkbox. (In Windows 8, 8.1 and 10)

Note: In Windows 7, check the **Microsoft .NET Framework 3.5.1** checkbox.

5. Click on **OK**.
6. Wait for Windows to complete the operation, as it downloads and installs .NET Framework 3.5. If it asks you to connect to Windows Update to download required files, click on **Yes**.
7. The required files will be downloaded and .NET 3.5 will be activated.
