

# How to auto calculate the sales price based on purchase price using sales price mark up?

To auto calculate the sales price of an item based on purchase price using sales price mark up, follow the steps below:

1. Run **HDPOS smart**. Click on the **Set-Up** button in the main screen.

2. In the Set-Up screen, go to 4<sup>th</sup> page. Click on **Settings**.
3. From the **System Settings** page, click on **General**.

4. In **General Setting** screen,

- Click on the **Item Definition** tab.
- Under **Item Attribute** group, you will see a field **Default Sales Price Markup**.
- Enter the **value of markup percentage** that you want to use in the textbox.
- Click on **Apply**.

The screenshot shows the 'General Setting' application window with the 'Item Definition' tab active. The 'Item Attribute' section is highlighted with a green circle. The 'Default Sales Price Markup' field is highlighted with a yellow box and contains the value '10'. A red arrow points to the 'Apply' button at the bottom right.

5. To see how this **Sales Price Markup** works, go to 1<sup>st</sup> page of Set-Up and click on **Item**.

6. From **Manage Items** screen, click on **Add Item** button.

7. In the **Add New Item** screen,

- Enter the **name** of item.
- Enter the **Category**.
- Enter the **last purchase price**.
- As soon as you enter the price, you can see the **sales price** is calculated automatically and got updated.
- Click on **Create** button.
