

How to configure Start - Up window in HDRestaurant?

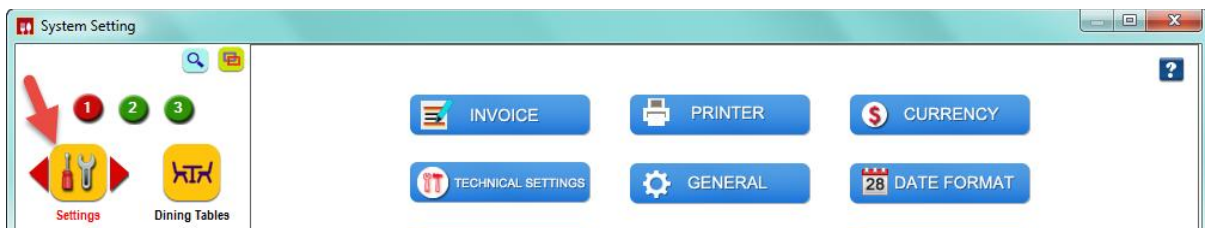

HDRestaurant Tutorials

HDRestaurant allows you to configure startup window as **Set-Up window** or **Billing Window** or **Restaurant Dashboard** for your convenience. By default HDRestaurant starts with **Restaurant Dashboard** as startup window. To configure startup window follow the steps below:

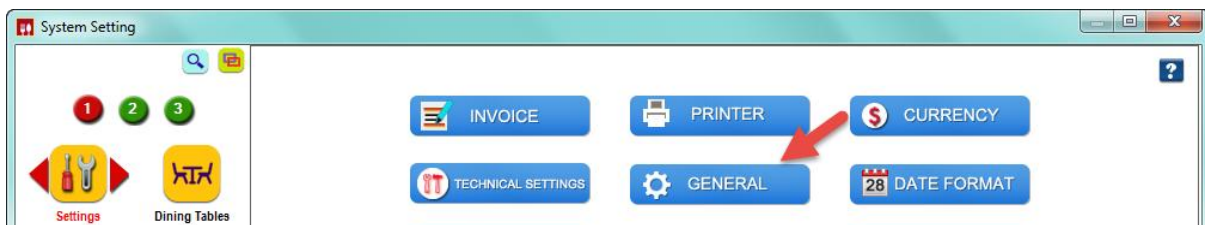

1. Run HDRestaurant.
2. From HDRestaurant Dash board click on Set- Up button.

3. Go to 1st Page, Click on **Settings**.

4. From **Settings** Window, click on **General**.

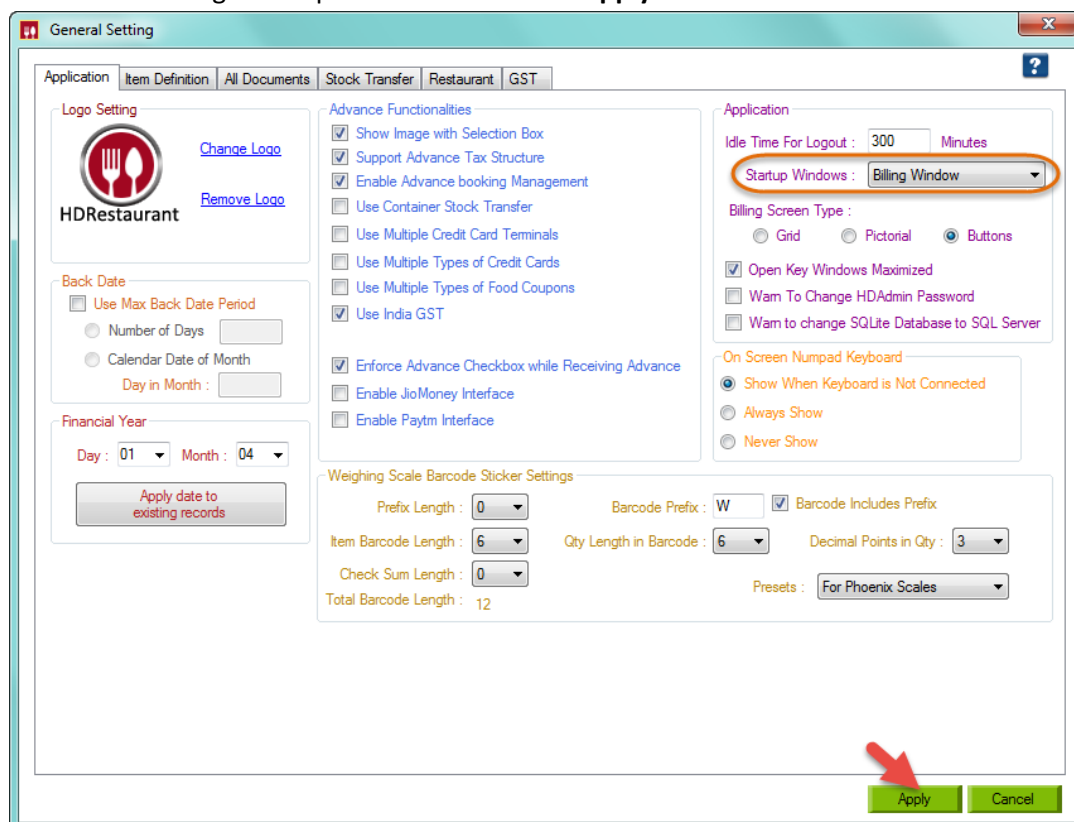

5. In **General setting**, select **Application** Tab.

6. In Application section select the Startup Window from the available options. You can select convenient **Startup Windows** out of these three:

- I. **Billing Window**
- II. **Setup Window**
- III. **Restaurant Dashboard.**

7. After selecting Start Up window click on the **Apply** button.

Note: 1. Any changes made to startup window, will require a restart of the HDRestaurant.
2. Any changes made to startup window are user (login) specific.

8. Restart the application. You will see Billing Window as your start up window.
