

How to Add Hall and Table in HDRestaurant?

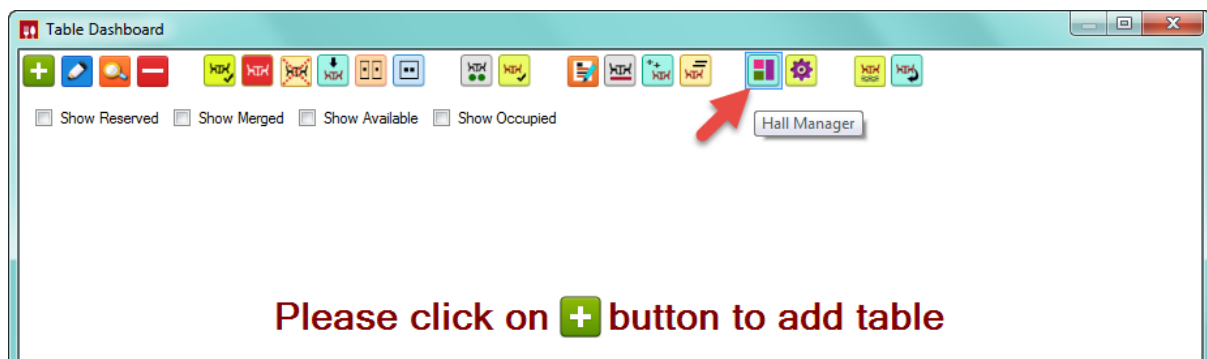

HDRestaurant Tutorials

HDRestaurant enables you to configure different table setups for the restaurant. You can also provide information of the table such as No. Of Chairs and Table Location, this information will be useful for waiters to place your customers as per their seating preferences.

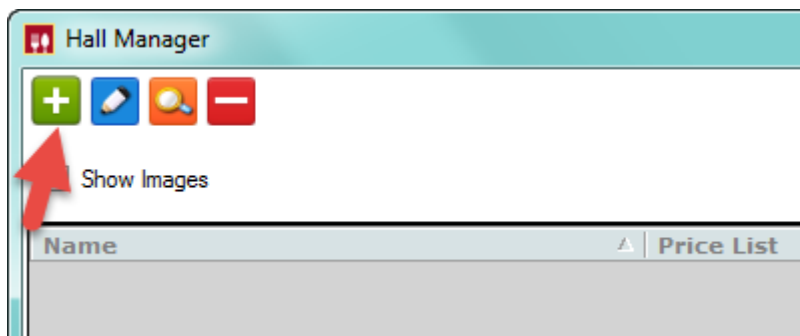

To add Tables in HDRestaurant, follow the steps below:

1. Click on **Table Manager**.
2. This will open **Table Dashboard** as shown below. In order to create a table in HDRestaurant, you're mandated to create at least one Hall.
3. To create a Hall, click on **Hall Manager**.

Please click on **+** button to add table

4. Hall Manager window, Click on **Add Hall** button

5. Fill the details such as Hall Name, Price List, Image and Description. Note: Price List and Description are not mandatory fields, you can leave them blank.

6. Click on **Create**.

7. Now to add table, click on  button.

8. Select the Hall, if in case you have multiple halls created. Enter the required details such as Table Name, No. of Chairs and Table Location and click on **Save**.

9. You'll see the table created in table dash board as shown below with all the information provided (No. Of Chairs, Table Location). Follow the same steps to add more tables.
