

How to do settings to take backup of database when application is closed?

To take back up of database when application is closed, you need to do the following settings.

1. Run **HDPOS smart**. Click on **Set-Up** button in the main screen.

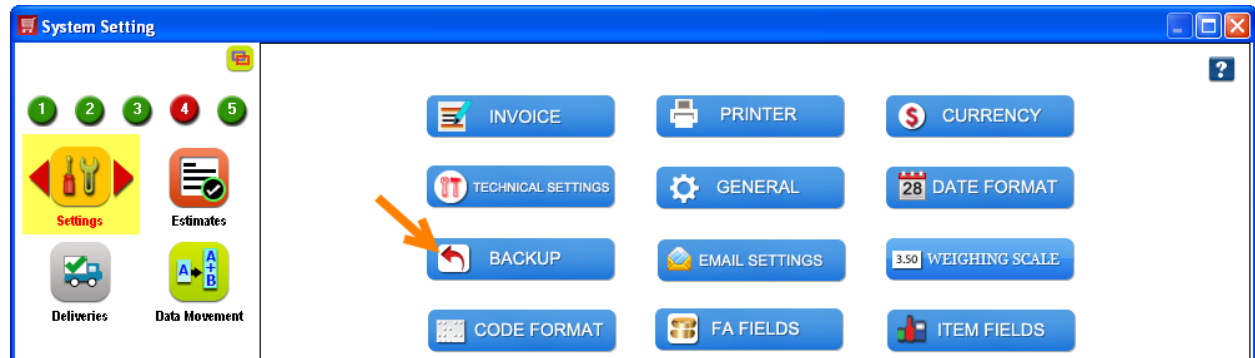

2. From 4th page of Set-Up, click on **Settings**.

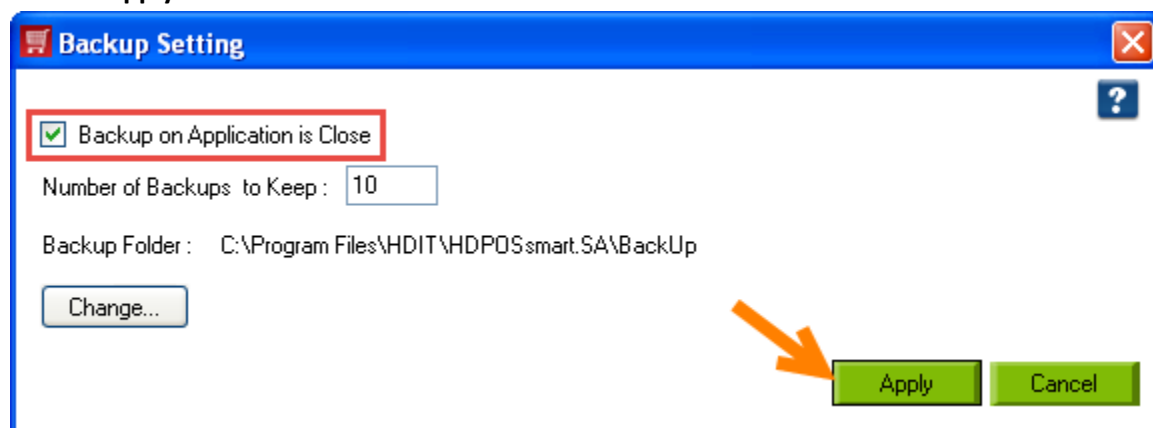

- From **System settings** screen, click on **BACKUP**.

- From **Back up Setting** screen, check the checkbox **“Backup on close in Disconnected Mode”**.

- Click on **Apply**.

- **“Backup on Application is Close”**: If this is checked ON, then every time the application is closed the database will be backed up in the location specified in **Backup Folder**.
- **Number of Backups to keep**: Here you can define how many recent backups to keep in the folder.
- **Backup Folder**: The database will be backed up in this folder. You can change the location by clicking on **“Change”** button and chose another location.

- Go back to main screen and close the application. You will see a message box showing that the database is getting backed up.

7. Go to the location of Back up folder in your computer and you can see the database back up file as shown below.

You can also see the 10 recent backup files that are saved here.
