

How do I restore Database in HDPOS smart?

HDPOS smart Tutorials

Restoring a database means replacing your existing database with some other database.

To restore a database in HDPOS smart, follow the steps below.

1. Run **HDPOS smart**.
2. From main screen, select **Set-Up**.

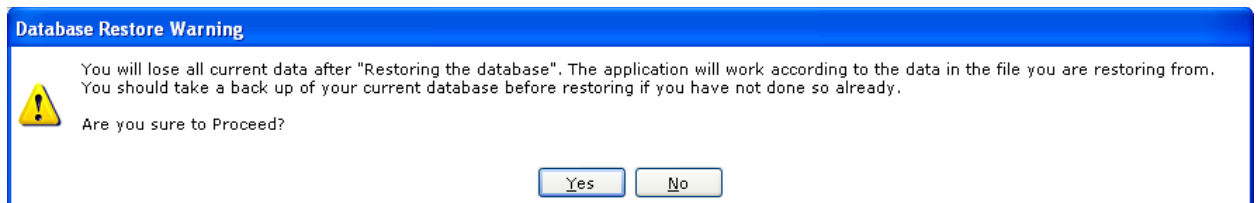

3. From the Set-Up screen, click on **Restore Database**.

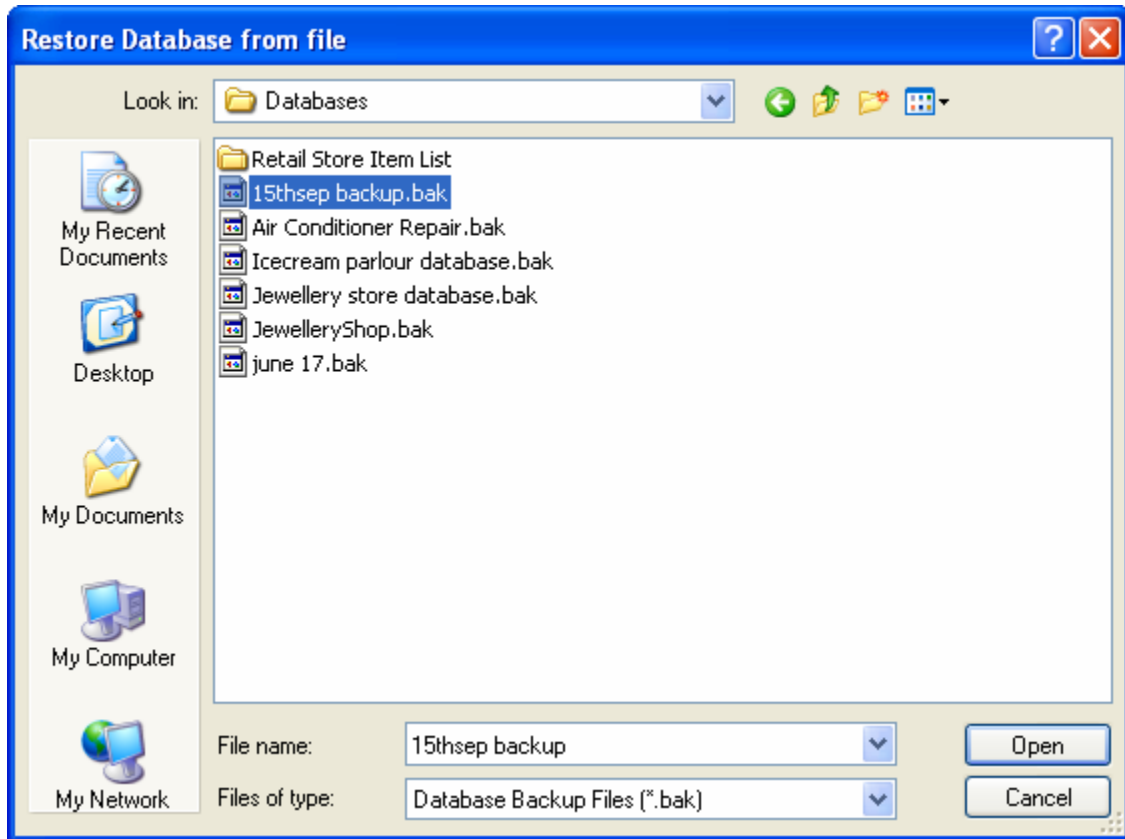

4. A **Database Restore Warning** message will be shown to confirm whether to proceed or not. Click on **Yes**.

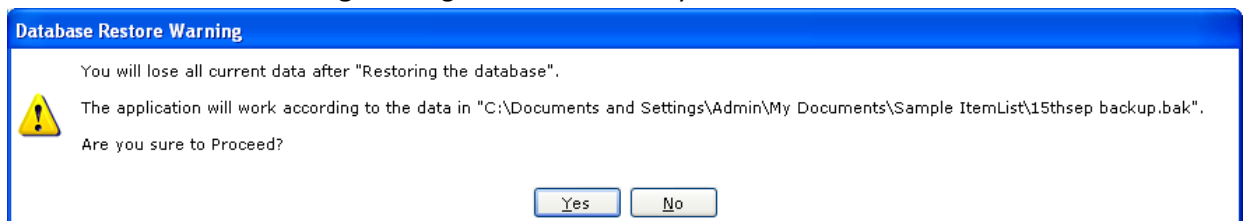

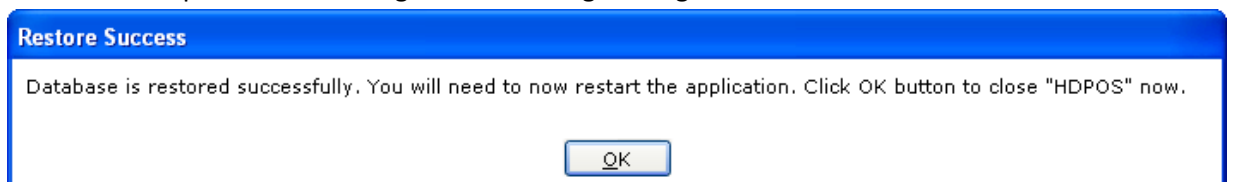

5. Select the database file that you want to restore. Click on **Open**.

6. A **Database Restore Warning** message will be shown to you

7. Click on **Yes** to proceed. You will get the following message.

8. Click on **OK**. HDPOS smart will get restarted and it will show you details of restored database.
