

How to scan Label Number from Barcode field?

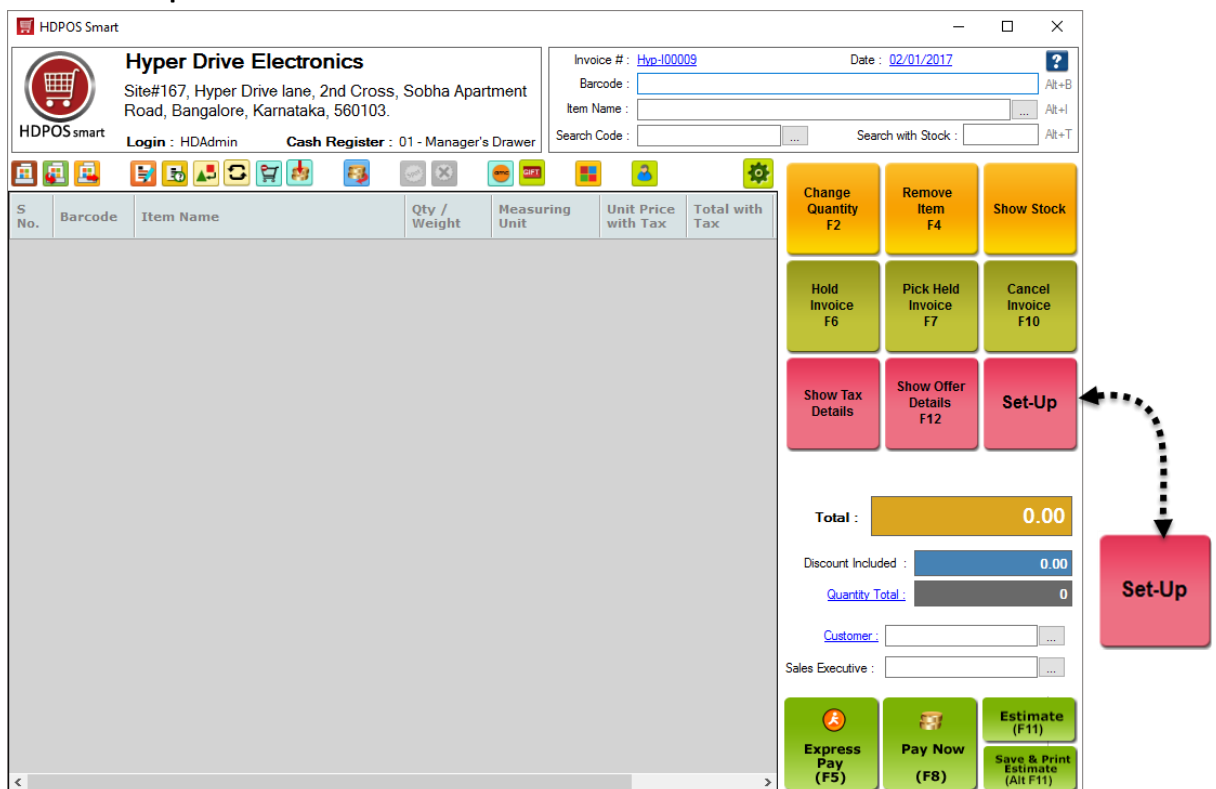

HDPOS smart Tutorials

HDPOSsmart allows you to scan the label number/serial number directly in the barcode field while adding item to invoice. On scanning the label number as you would scan the item's barcode, the item is added and the label is selected for invoicing.

To allow scanning of label numbers in barcode field, the settings has to be changed appropriately.

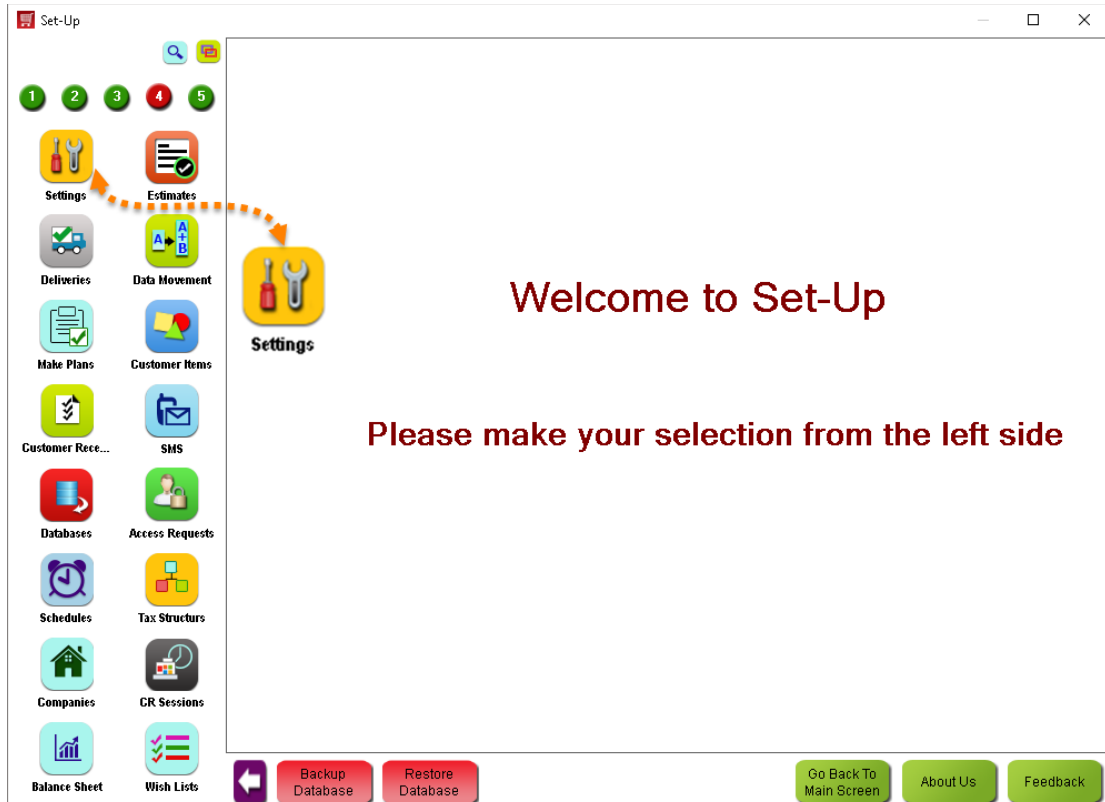

Steps to change settings to allow scanning of Label Numbers in barcode field are as given below:

1. Run **HDPOS smart**.
2. Click on **Set-Up**

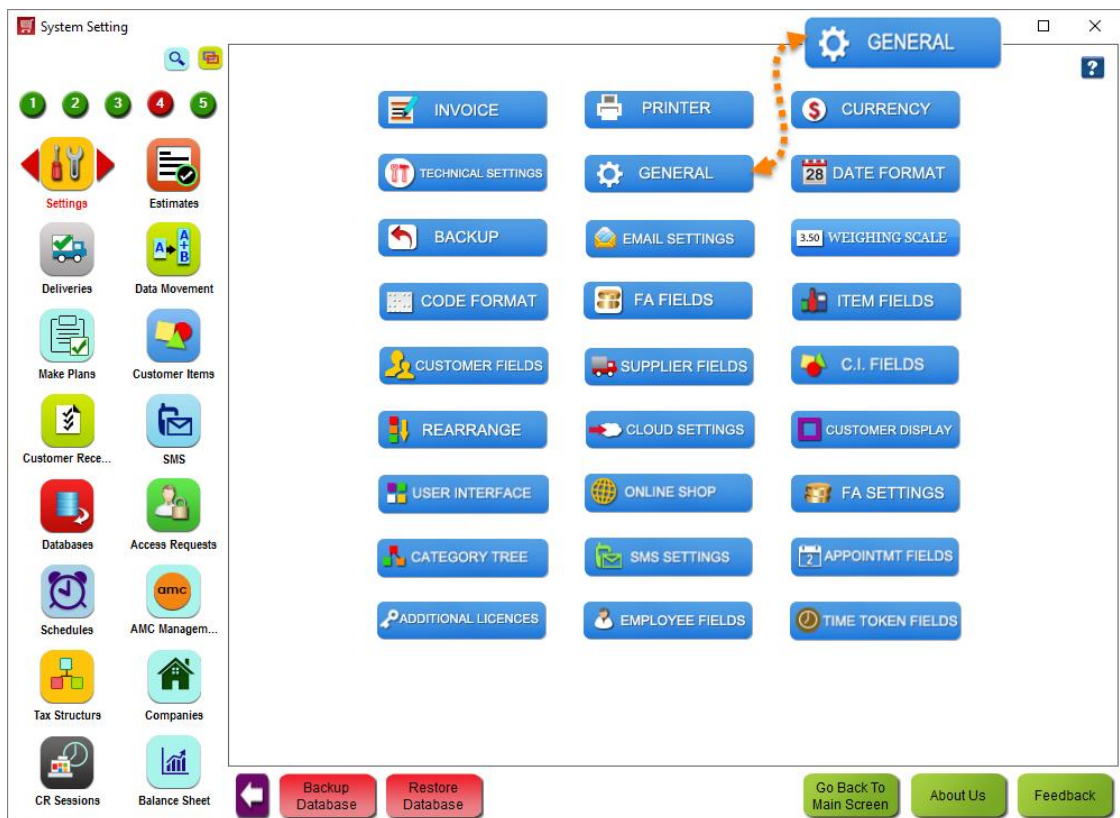

3. From the 4th page of setup, click on **Settings**.

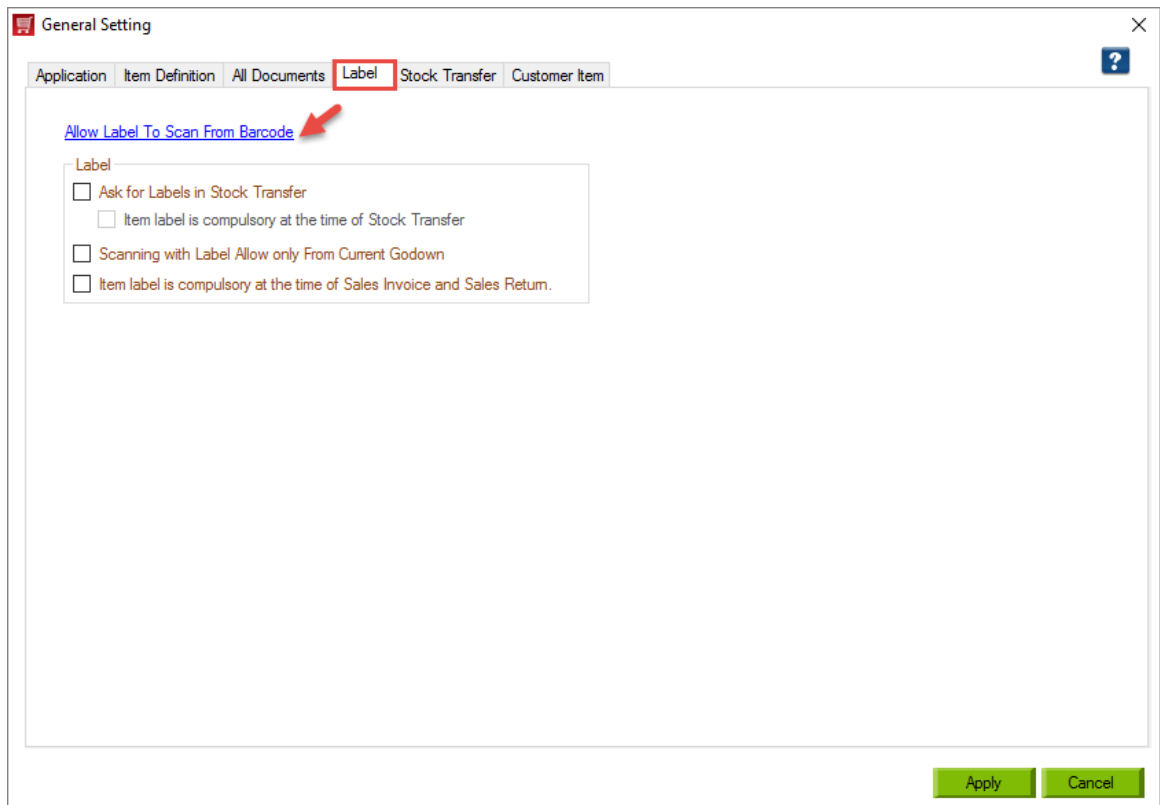

4. In Settings window, click on **General**.

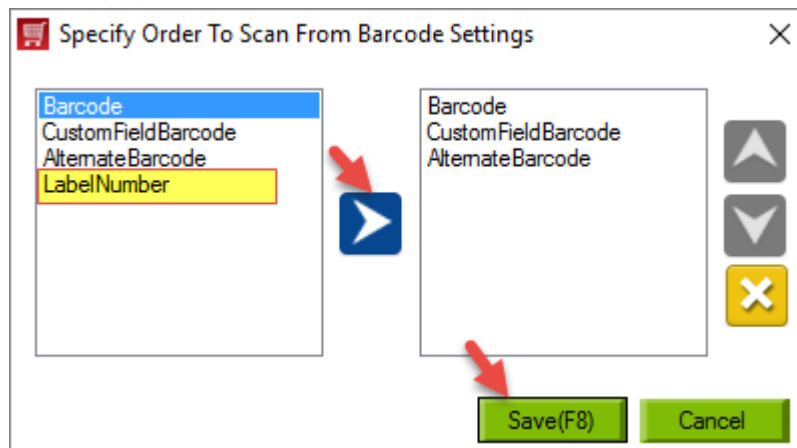

5. In Label tab, click on **“Allow Label To Scan From Barcode”** link.

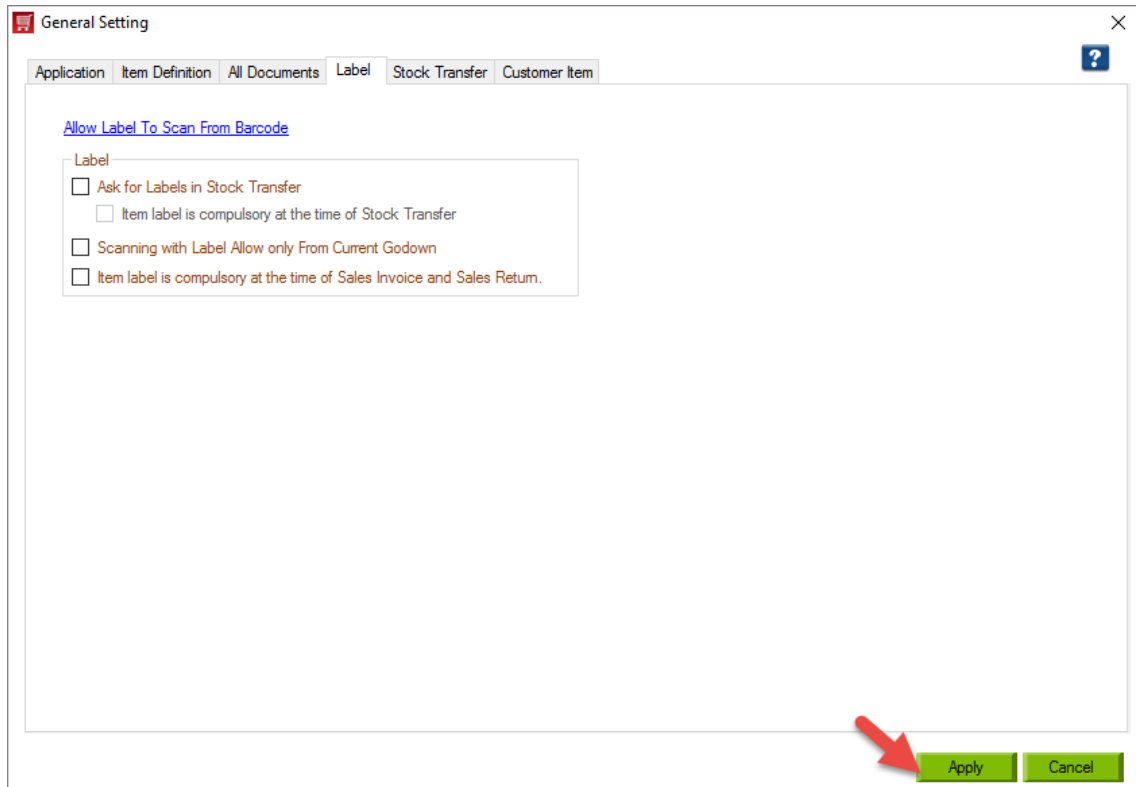

6. You will see the following **Specify Order to Scan from Barcode Settings** window.

- a. Select **LabelNumber** from left side of the screen.
- b. Click on  button to add label number in the order to scan from barcode field.
- c. You can change this order by selecting a field and clicking on  or  button.
- c. Click on **Save (F8)**.

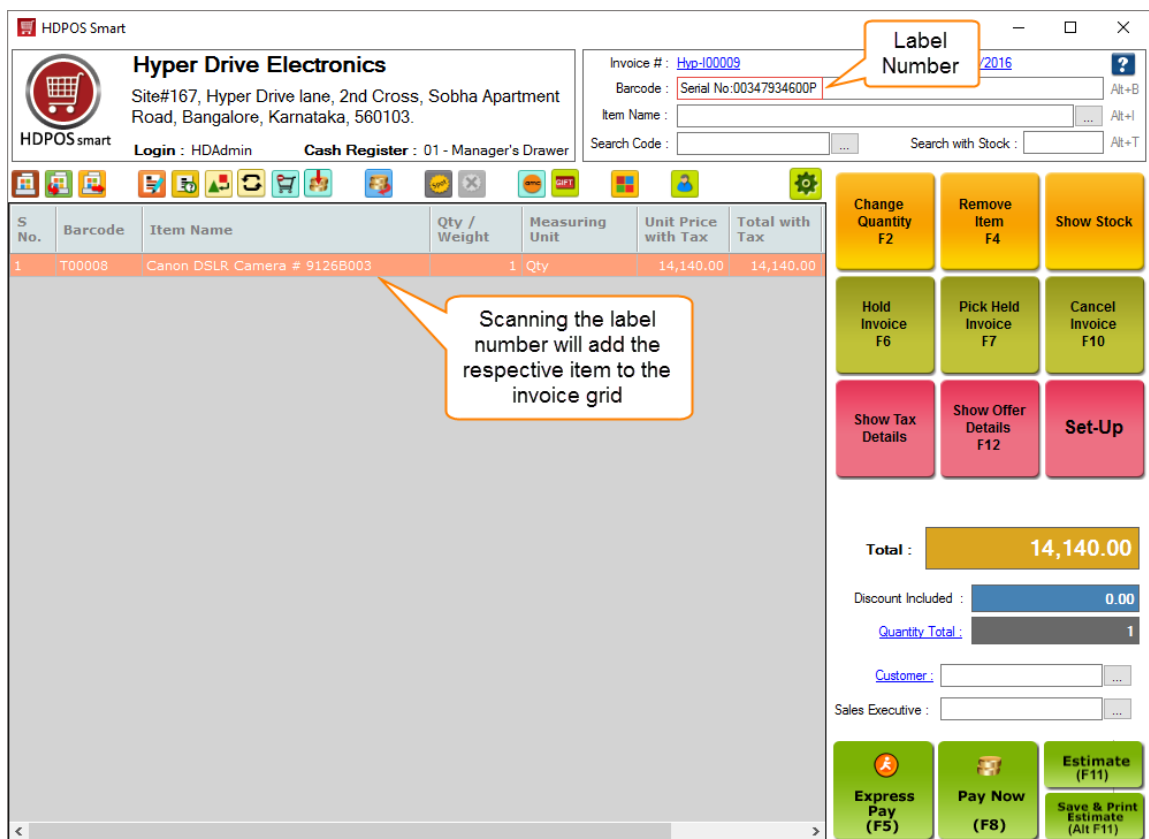

7. Click on **Apply**.

8. Go back to the main screen and scan the Label Number from barcode field.

Note: You can click on **Add Label**  toolbar button or (CTRL + L) to verify the label number added to the invoice.

Add Labels [Close] [Maximize]

Item Name : Canon DSLR Camera # 9126B003
Item Quantity : 1
Number of Label : 1
Select Label : ...

| SerialNo | Serial No |
|----------|--------------|
| 1 | 00347934600P |

9. Continue adding more items as required, or proceed with billing.
