

How to set Loyalty Redemption Settings in HDPOS smart?

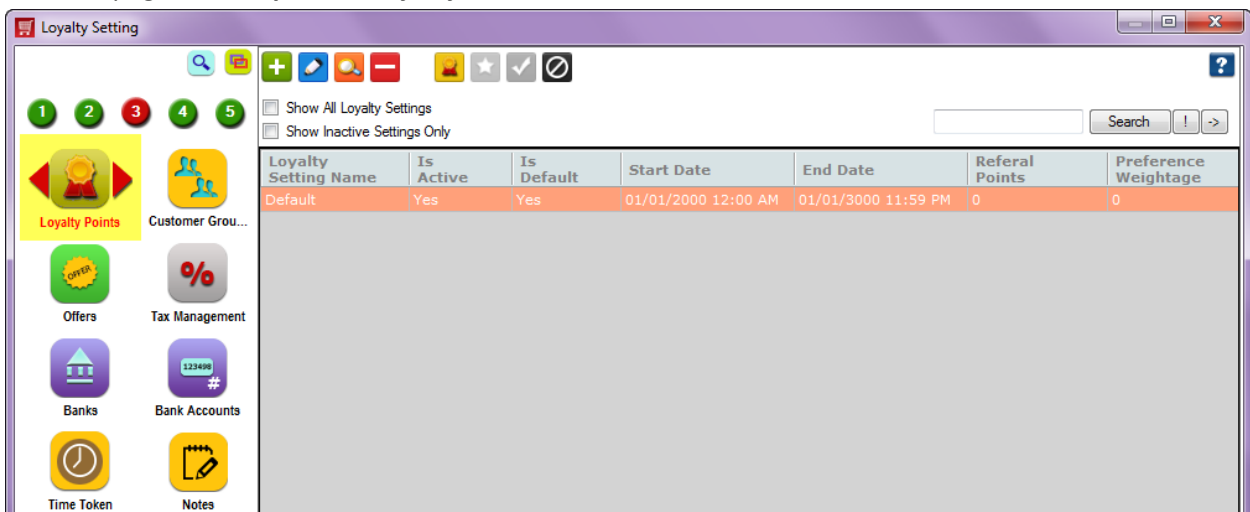

HDPOS smart Tutorials

In HDPOS smart Users can easily set **Loyalty Redemption points**. Below are the steps which you need to follow to set Loyalty Redemption points.

1. Run **HDPOS smart** & Click on **Set-Up** button on the main screen.

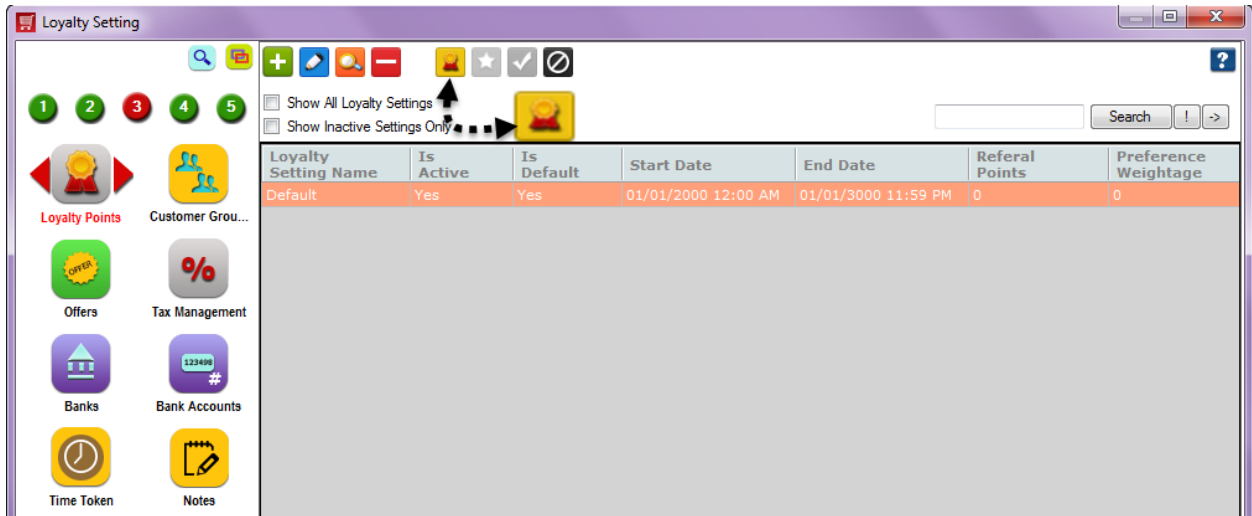

2. From 3rd page of **Set-Up** select **Loyalty**.

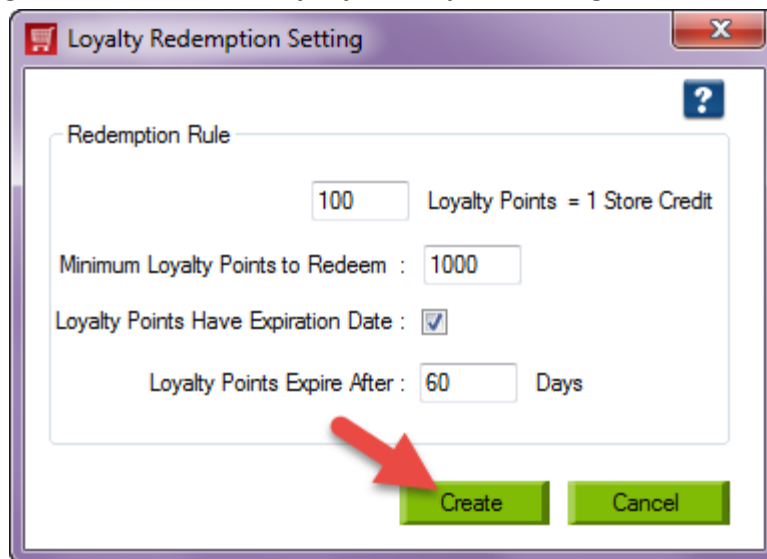

- From **Loyalty Setting** screen, select a loyalty program and click on **Set Loyalty Redemption Setting** button:

- This will bring the below screen of **Loyalty Redemption Setting**.

- Loyalty Points are equal to 1 Store Credit:** Enter a number for loyalty points which you want to give as equal to 1 Store Credit.

By default Loyalty points populate as 100 which means for 100 loyalty points customer will get 1 store credit. You can change it to any value according to your requirement.

For E.g.: **100 Loyalty Points = 1 Store Credit**

1000 Loyalty Points = 10 Store Credit

- Minimum Loyalty Points to Redeem:** Enter the minimum number of loyalty points you want to keep for redemption of Loyalty Points. By default the value is 1000.

- c. **Loyalty Points Have Expiration Date** checkbox: If you want to give expiry date for loyalty points, check this checkbox. By default loyalty points do not get expired.

For E.g. this means if the customer earns loyalty points on 15th May 2014 and the expiry period has been set to 60 days then the loyalty points will expire after 60 days from 15th May 2014.

- d. **Loyalty Points Expire After:** Enter the number of days after which loyalty points will expire. This field will be enabled only when you check the checkbox of Expiry Date.
- e. Click on **Create** button.
